- Gifted & Talented
- Homeless
- Limited English Proficiency
- Migrant
- Economically Disadvantaged
- Free & Reduced Lunch
- Special Education
- Homeschooled
- Title I
- Any Other Programs

## Eidex – MiDataHub Readiness Checklist

4. Run [MiDataHub-Eidex Readiness Script](#) to ensure all data has been loaded
5. Notify Eidex team that set up is complete by emailing [support@eidexinsights.com](mailto:support@eidexinsights.com) with the following information:
  - District name(s)
  - School years populated in the MiDataHub
  - What is available: *rosters, attendance, behavior, and/or interventions*
  - Any other questions/issues/comments/etc.

### **Setting up MiDataHub Alerts:**

#### [Creating an Alert Subscription – Audited Activity:](#)

This documentation will walk users through the process of creating an Alert Subscription when an API Integration is added to your cockpit. This alert subscription walkthrough will be demonstrated using the audited activity option. An audited activity occurs when specific field/fields are modified or updated in your ODS. Examples of the audited activity notification typed when API integration are created, the district status changes, users are added, and many more.

#### [Creating an Alert Subscription – Scheduled Activity:](#)

This documentation will walk users through the process of creating an Alert Subscription on the Data Freshness in your ODS and will be configured to send an alert when data in your ODS has not been updated for 5 days. A scheduled activity is a predefined set of rules around specific activities within your ODS. The alert subscription walkthrough will be demonstrated using the Scheduled Activity option, Data Freshness activity option.
